The prototype site is available at currentcoincreate.com.

1 Guide

The prototype was created to demonstrate the functionality of the CurrentCoin platform, in advance of its deployment.

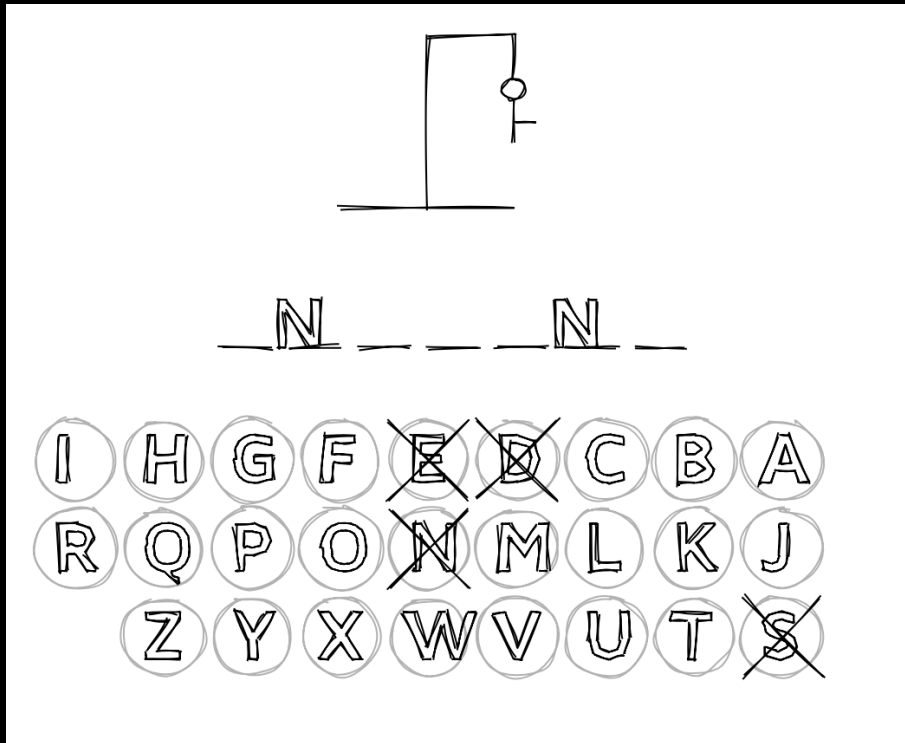

Templates are available on currentcoincreate.com today, which we encourage all our readers to try.

The image shows a web interface with a dark blue sidebar on the left and a light blue main area on the right. The sidebar contains the 'CurrentCoinCreate' logo (a blue circle with a white 'C' and a gear-like border) and the word 'Templates' in white. Below 'Templates' are four white buttons with dark blue text: 'Brand Page', 'Chat', 'Contact Us', and 'Info Spinner'. The main area has a light blue header with the word 'Preview' in dark blue. Below the header, the text 'Contact me by filling out the form' is displayed. Underneath this text are three input fields with dark blue labels: 'First Name', 'Last Name', and 'Company Name'. Each label is positioned above a white input box with a dark blue border.

As these are all for demo purposes, they are free to use, through the use of a demo currency created for this purpose.

A real example is shown below: our text-based game of hangman.

We'll be working to fully stock our site with templates, of various types: office applications, informational websites, games, and more.

These templates are intended to show you that functionality, in action.

2 YouTube

We've uploaded a [video](#) talking about the prototype to our [channel](#).

3 Available Now

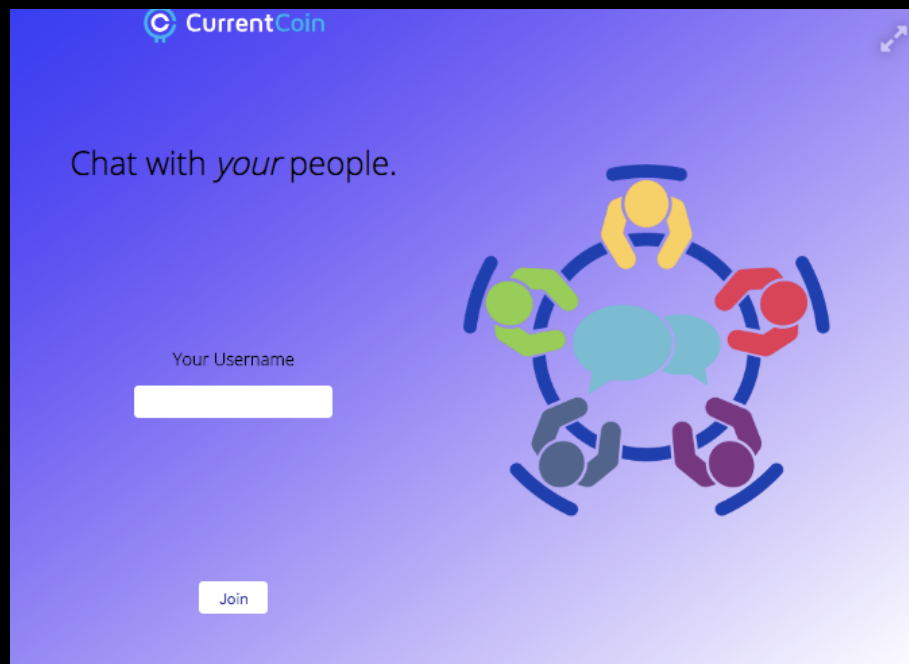

The template types we have available at the time of writing are:

1. informational site

2. survey site (for collecting emails)
3. spinning brand logo site
4. chat tool
5. game (text-based)

4 Live App

To focus in one example and view the process in action, see our chat tool.

When choosing this template, you'll be prompted for a username.

Once you select it, and our demo coin is sent to the appropriate address, you'll be shown an address where you can visit and use your deployed site.

Your site will be live for several days. You'll be able to distribute the link to others to join your chat.

Once your site is expired, the site will be destroyed, and no further action will be needed from you.

Connect.

Kevin a few seconds ago

Hello

Wanda a few seconds ago

Hi Kevin

Wanda a few seconds ago

Nice to meet you!

For demo purposes, we are handling all aspects of payment. On the live platform, a real check will be completed.

As long as the payment and configuration prerequisites are met, your site will be deployed as seen on the prototype.

5 Future Development

Post-platform deployment, we plan to:

1. increase the number of templates
2. diversify the range of applications
3. allow template creators to be compensated in CurrentCoin
4. include support for payment with different cryptocurrencies

6 Contact

Please try the templates out and share your feedback by writing to us at info@currentcoin.io and contact@currentcoin.io.

Any and all feedback is welcome!
